Task 2

考试日期	2019.02.16
类别	教育类
题目	Nowadays, children spend too much time watching TV and playing computer games. Some people believe this has negative effects on children's mental abilities. To what extent do you agree or disagree?
题目翻译	现在，孩子们花太多时间看电视和玩电脑游戏。有些人认为这对儿童的心理能力有负面影响。你在多大程度上同意或不同意？
写作指导	<p>1. 注意时态，不要出现过去时（除非举过去的例子）</p> <p>2. 不管立场是中立还是一边倒，一定要讨论双方观点</p> <p>推荐立场：中立，只要合理地使用电视和电脑游戏，它们是能够对孩子的心智起到积极的开发和提升作用的</p> <p>推荐思路：五段式</p> <p>让步段阐述其存在的弊端，中间两段可以具体阐述它们是如何对孩子的心智起到积极的开发和提升作用的</p> <p>Opening: 背景介绍，表达观点</p> <p>Body1: 不良信息会使孩子自我和社交封闭</p> <p>Body2: 内容经过严格审查，能够锻炼孩子的心智</p> <p>Body3: 灌输方式灵活多变，易于接受</p> <p>Conclusion: 重申立场，总结观点，做适当的论点概括</p>
写作范文	<p>Nowadays, children spend too much time and energy on computer games and TV. Parents worry that this will not only hurt their children physically, but also affect their studies. They are also worried that some unhealthy contents will make their children be negatively affected psychologically. My view is that although computer games and television may have some negative effects on children's psychology, their positive effects are greater than others.</p> <p>Admittedly, spending too much time and energy on computer games and television can make children unsociable to some extent. Children's attention is strongly attracted by computers and television, resulting in insufficient time to communicate with their peers, which is not conducive to their interpersonal relationship. Besides, some unhealthy information will make</p>

	<p>children who do not have judgment become irascible, isolated and difficult to get along with.</p> <p>However, there are many positive things in TV and computer games. At present, the restriction and censorship of TV broadcasting content and the scope of computer games are relatively strict, which to a large extent is equivalent to setting a strong barrier to the mental health of adolescents. And the contents of some TV and computer games are also very healthy and helpful. Some of their programme settings and contents will be very good to develop teenagers' analytical ability, speculative ability, team consciousness, and cooperative ability. In this way, children can improve their communication and expressive ability, as well as their self-confidence, independence and so on.</p> <p>And now many TV and computer games are very rich in content, involving many disciplines and daily life. They present in a very flexible way, which can be specifically instilled according to the children's receptive ability, cognitive level, and preferences and habits. This invisibly cultivates children's curiosity and interest in knowledge, the world, and is very helpful for their intellectual development.</p> <p>Therefore, as long as TV and computer games are properly and reasonably used, they can play a positive role in the development and improvement of children's mental ability.</p>
